Dr. Maria Montessori

## Montessori Concept

In the year 1907, Dr. Maria Montessori introduced a new method of education for nurturing young children. In her research, she made an observation that every child as an individual has his or her own unique capabilities and pace of learning. Children are keen to explore new things and master new skills. According to her, this individuality must be encouraged and the children should be provided enough space to initiate projects on their own. For such encouragement, children must be provided with right stimulation through sensory and artistic education supplemented with proper ambience. They should have the freedom for exploring things on their own. This, in turn, ensures amazing overall development of each child helping him to achieve his full potential.

## Our Purpose & Belief

The main purpose of Montessori Training Board is to develop a course curriculum in sync with the modern methodologies and new approaches in the field of teaching and training. MTB aims to produce future teachers with a unique set of abilities to teach learners from diverse backgrounds.

There are a set of beliefs which Montessori Training Board abides by. MTB believes in the three most significant parts of learning and education - ritual, music and movement and modern teaching styles which are blended with traditional concepts of teaching to produce teachers who are adept in teaching both adults and children. At MTB the stress is on practical application as it is believed to be the best way to learn and accommodate different modes of education. MTB firmly believes that there can be nothing better than self directed and self paced education.

*"Montessori is an education for independence, preparing not just for school, but for life."*

- Maria Montessori

## Importance of the Course

Montessori Training Board's Diploma in Teacher Training Course provides a platform for aspiring as well as professional Pre primary teachers to facilitate child centric learning through storytelling, rhyming games and play. The course helps the Pre primary teachers to learn the methods of planned teaching through play and experiments. If one loves to help young children and give them a great start in life then with proper teacher training one can pursue a career as a Pre primary teacher. A Pre primary teacher needs to be creative and flexible with a focus on optimum child development. The course will be extremely beneficial for all those eyeing a career in this emerging area of education as a Pre primary.

## Job Opportunities

Montessori Teacher Training course prepares the teachers to meet the demands of the young learners' classroom. The course covers different methodologies and disciplinary techniques with a sharp focus on young learners. Montessori Training Board's Diploma in Teacher Training opens many doors to numerous jobs as the course aims to equip the trainees with the approaches and methodologies of pre primary teacher training which will strengthen employment opportunities. The course will provide the skills and experience to teach children in the age group of 0-5 years as nursery teachers. After a few years of experience the Pre primary teachers can work as early years coordinator or as deputy head in a primary school. They can also apply for the post of Pre primary school in-charge who is responsible to run the day to day operations of childcare settings. The course could be immensely helpful for early childhood curriculum developer, consultant associated with Pre primary schools and even for those planning to open a pre-school. The course is suitable for not only Pre primary teachers but anyone connected with primary education.

## Why Teacher Training From MTB?

Montessori Training Board is a very well known institution offering a bunch of excellent teacher training courses to prepare prospective teachers equipped with all the latest teaching strategies and methodologies to become a part of a challenging as well as a sought-after profession. MTB has already earned recognition by providing courses with comprehensive curriculum, expert faculty and earnest support team. The courses on offering- Certificate Course in Montessori Teacher Training, Diploma in Montessori Teacher Training, Nursery Teacher Training, Masters Degree in Pre-Primary Teachers Training are designed to train future teachers to be competent enough to teach a diverse range of students and can easily keep up with the regular challenges that 21st century teaching sometimes poses. The courses will be intensive learning experiences for the trainees as they cover all the aspects of childhood education and as these early years are a critical stage for development of a child it is extremely important for teachers in early education to be ably trained as the training will help to develop the sensibilities which an early childhood educator needs. MTB's teacher training courses will enhance the teacher's effectiveness by giving them a proper grounding in all areas of child development and early childhood teaching. The array of courses will give the aspiring teachers to pick programs according to their interests and requirements as these kinds of training will help the early childhood educators to learn the methods of planned teaching through play and experiments. Even professional teachers can hone their teaching skills as these courses give a keen insight into the teaching methods of early childhood education. Moreover, the teacher training courses are becoming compulsory for aspiring educators these days because they have a direct impact on the development of children and lay the foundation for the future learning of children.

# Certificate Course In Montessori Teacher Training
